R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Make a data frame

Make a data frame from the **air quality dataset**. In the same chunk clean the dataset from *NA values*.

```
airquality[1:10,]
```

## 3	12	149	12.6	74	5	3
